## For the Oculus GO and Samsung Gear VR head mounted displays

1.

2.

### OCULUS GO:

1. After turning on the VRGO (Blue or Purple mode) Open Oculus GO mobile app and press the controller tab

2. Within Pair New Controller choose to pair Gamepad

3. Wait for the VRGO to be recognised (place phone and Oculus GO close to the VRGO if it fails to find the device). Choose VRGO Chair controller.

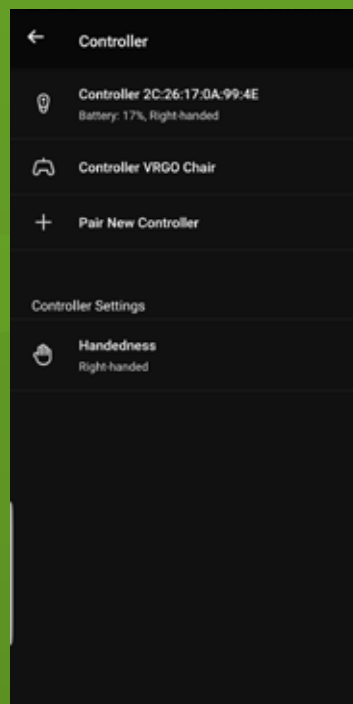

4. When connected it will show that is recognised and connected as a controller. You may now play the games that use gamepad left thumbstick control.

(Please refer to VRGO website for compatible games.)

3.

4.

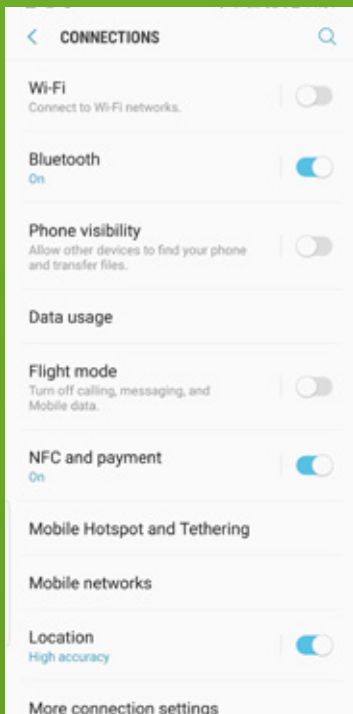

## SAMSUNG GEAR VR:

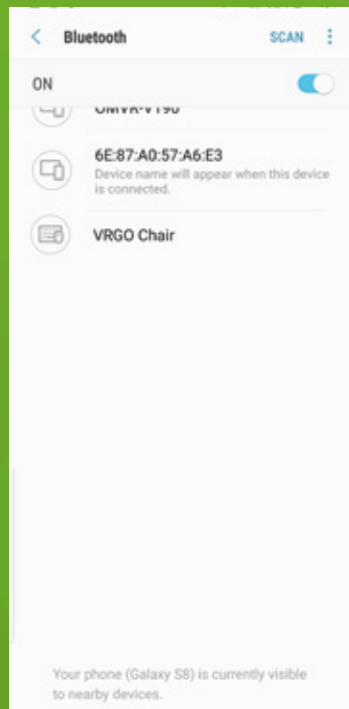

1. Within settings App select Bluetooth.
2. Wait for the VRGO to be recognised (place phone close to the VRGO if it fails to find the device). Choose VRGO Chair.
3. When connected it will show that is recognised and connected as a controller. You may now play the games that use gamepad left thumbstick control.

(Please refer to VRGO website for compatible games.)

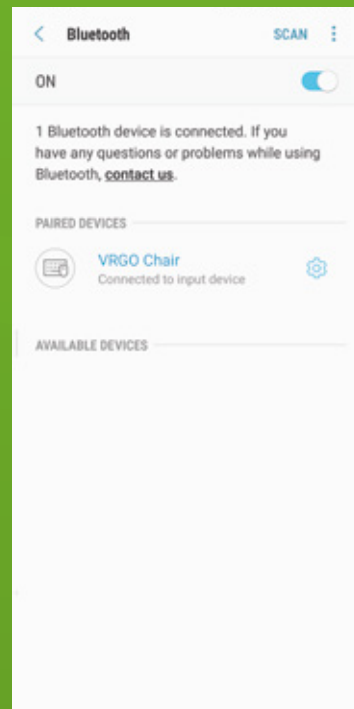

1.

2.

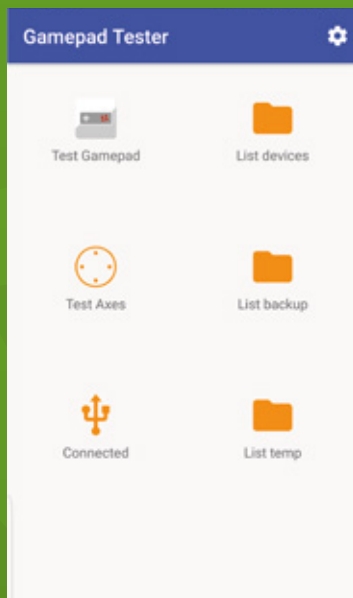

3.

## GAMEPAD TESTER

1. Gamepad tester is a free downloadable app for Andriod. Once downloaded choose test Axis
2. Test Axis by tilting the VRGO in all directions

1.
