## Product Overview

## Product Features

- 1 – Foam Seat Pad
- 2 – Composite Shell Structure
- 3 – Rubber Interfacing Ring
- 4 – USB Charging Port
- 5 – Push Button Switch and LED Indicator

## Before First Use

Read these instructions carefully before use.

Remove both parts carefully from the packaging and inspect for any damage.

Assemble the two halves by carefully locating the rim of the upper shell into the rubber interfacing ring in the lower shell, and pushing firmly together.

Important: The upper shell must be fully engaged in the rubber strip prior to use! Failure to engage correctly could result in damage to the product and injury to the user.

Connect the USB charger to the charging port (4), and charge for 30 minutes.

The button will flash yellow until the battery is fully charged. The button will flash green when fully charged and red when running low on charge.

Important: The product should only be charged as required, and not left permanently connected to the charger.

## Using your VRGO

Ensure that all safety requirements have been taken into account.

Once the VRGO is fully charged, disconnect it from the USB charger, and unplug the charger for later use.

Ensure that the VRGO is on a level surface, and is in its vertical orientation (the system will self-calibrate after switch-on against this known vertical).

Switch on the device by briefly pressing the button (5); the LED will begin to flash.

The device is now ready to be paired with your Bluetooth device – if you scan for devices it will show up as VRGO Chair. Once paired, the LED will show a steady colour. The colour identifies one of the four possible modes of operation. The 4 modes can be cycled through by briefly pressing the button, and should be selected for best operation depending on the application/game.

## The modes are as follows:

**White:** Keyboard

**Yellow:** Keyboard and Mouse

**Blue:** Gamepad Controller (No Yaw)

**Purple:** Gamepad Controller (with Yaw)

Once the desired mode is selected, the device is ready to use. Carefully sit on the VRGO, and steer your way around your own virtual reality by leaning and turning in the direction you want to go.

## Care and Cleaning

Your VRGO has a tough composite outer shell, however some precautions should be taken to ensure it remains in best condition.

Disconnect from the charger and switch off the unit while cleaning

Wipe clean with a damp cloth. Do not use abrasives, or abrasive cream cleaners. Avoid the faceplate area where the electrical connections and push button switch are located – these should not be exposed to moisture.

The seat pad can become dirty and worn with heavy use. This can either be replaced or covered with a new foam pad, which is available online.

## Service

The product is not user serviceable and has no user-serviceable parts except replacement of the seat pad once worn.

If the product is not working, try switching it off, and recharging it for 30 minutes before attempting to switch it back on.

If your product requires repair, you must contact us, stating the model name and serial number (found on the label on the rear of the product).

If the product is to be returned to us for repair, carefully repack it in its original packaging along with a letter stating your name and address, a copy of your original receipt or purchase, and the reference number provided to you by our service line.

We may ask you to return only part of your unit for service. This should be robustly packaged to avoid further damage.

## Health and Safety

TO MINIMISE THE RISK OF PERSONAL INJURY OR DAMAGE, USERS MUST READ THE FOLLOWING HEALTH AND SAFETY GUIDANCE BEFORE USE:

Read all of the manual before use. VR users can easily become disorientated. Care should be taken to avoid serious injury due to falling

from the VRGO while immersed in a virtual reality.

VRGO must be used in an area which is clear of obstacles. Assess the surrounding area, and remove any hazards which may cause injury or harm to the user in the event that they lose control due to disorientation.

VRGO can be used on most surfaces. Some surfaces can be slippery however, and care should be taken to avoid these.

Suitable footwear should be worn when using VRGO to ensure full control during gameplay. We recommend light-weight trainers or similar, which must provide sufficient grip on the floor surface in use.

We recommend using Elbow and Knee protection when using VRGO in a harsh environment, such as a hard floor. Users should consider using protection similar to rollerblades, or skateboards depending on their experience and ability.

Please refer to your VR headset manufacturers health and safety guidelines for using VR responsibly.

Do not use the VRGO if you are tired, dizzy, or under the influence of medication, alcohol, or recreational drugs.

Do not use the VRGO if your balance is, or may become, impaired in any way. This may for example be through illness such as an inner ear infection, suffering vertigo, or other balance related ailments including hangovers.

If you are pregnant, or suffering from any physical condition which may make you more susceptible to injury, then you should seek advice from your doctor before using VRGO.

Although the VRGO is intuitive to use, we recommend that you become accustomed to using the device gradually, firstly without the VR headset, then with short segment of immersion, before longer play sessions.

VRGO is not suitable for use by children under the age of 8. Children using VRGO must be accompanied by an adult at all times.

VRGO has been designed to avoid long periods of sedentary gaming, however, users should take regular breaks to optimise balance and alertness.

VRGO should only be used by one person at a time. The maximum player weight must never be exceeded. Never 'drop' onto the VRGO from standing.

Some parts of the inside of the shell may be sharp due to the manufacturing process. Do not touch the inside of the VRGO shell.

The VRGO must be fully assembled before use – Never sit on part of the unassembled VRGO!

If the VRGO shell becomes damaged, sharp edges can be formed – these must be handled with extreme care. Wear appropriate gloves, and repackage in to its original packaging for return. Do not use the VRGO if it is broken.

- DO – Avoid hazardous obstacles
- DO – Wear footwear with appropriate grip for the surface
- DO – Practice first without the headset
- DO NOT – use VRGO unless you are fit to do so
- DO NOT – seat more than one person at a time on VRGO
- DO NOT – use part of an unassembled VRGO
- DO NOT – use a damaged VRGO

## Guarantee

This product is guaranteed against manufacturing defects for a period of 1 year.

This product is guaranteed for 12 months from the date of original purchase. Any defects that arise from faulty materials or workmanship will be replaced, refunded or repaired free of charge where possible during

this period by the dealer from whom you purchased this chair.

The guarantee is subject to the following provisions:

- The guarantee does not cover accidental damage, misuse, normal wear of seat pads and other foam aspects of the chair
- The product must be correctly installed and operated in accordance with the instructions contained in this manual
- It must be used solely for a domestic purpose
- The guarantee will be rendered invalid if the product has been resold or tampered with in any way
- The manufacturer disclaims any liability for incidental or consequential damages
- The guarantee is in addition to, and does not diminish your statutory or legal rights

## Disposal and End of Life

At the end of the products useful life, it should not be discarded with unsorted household waste.

This product must be recycled where facilities exist. Check with your local authority or retailer for recycling guidance in your area. The VRGO will contain conventional electronic waste, a Li-ion battery, and a glass reinforced composite shell

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
